

CASCADE-LUNG

Cancer Screening Assay using DELFI

Be a Part of the Future of
Lung Cancer Screening

Our goal is to make screening easier and more accessible so people can live longer, cancer-free lives. With your help, we are taking the next step in pioneering this crucial screening technology.

What is CASCADE-LUNG? We are recruiting approximately 15,000 individuals for a large-scale study to help determine the ability of our simple, blood-based screening technology to detect lung cancer accurately and reliably.

Eligibility Requirements

50 years of age or older

Current or former smoker with greater than 20 pack-years history of smoking. One pack-year is equal to smoking 20 cigarettes (1 pack) per day for 1 year. As an example, smoking 2 packs per day for 10 years is equal to 20 pack-years.

Planned or have scheduled lung cancer screening **chest CT scan** within 30 days of study enrollment

Have **not been diagnosed with or treated for any cancer** in the past 2 years (other than non-melanoma skin cancer or carcinoma *in situ*)

3 Steps for Trial Participation

1. Talk to your healthcare provider for more information and sign consent form
2. Simple blood sample collection
3. Chest CT scan
